**TIME for both sessions:** 10:00 am - 12:30 pm      **COST per session:** \$120

### Curriculum for 3 year olds

The 3 year old summer session teaches ballet, tap, tumbling, and creative movement. Each of these types of dance works different parts of the brain and different parts of the body. Ballet improves balance and concentration; tap enhances counting and rhythmic skills; tumbling is great for increasing muscular strength and flexibility; creative movement allows children an opportunity to express their emotions and love of dance in a supportive environment. While we are proud of the accomplishments the 3 year olds are able to make in these areas, we are equally proud of the social skills they develop (such as learning to work in a group, to respect group norms, to take turns and listen quietly while others speak, and to respect a teacher's authority).

### Curriculum for 4-6 year olds

This age group learns ballet, tap, tumbling, and jazz. In addition to the dance disciplines, this program also includes dance-related arts and crafts, projects that teach about health and nutrition, dance history lessons, and beginning choreography skills. A nutritious lunch is provided while we watch dance films featuring Broadway and film stars, such as Gene Kelly, Fred Astaire, Shirley Temple, Mikhail Baryshnikov, and Gregory Hines; this is usually our most popular activity!
