#### **Class Curriculum**

The summer session teaches ballet, tap, tumbling, jazz, and creative movement. Each of these types of dance works different parts of the brain and different parts of the body. Ballet improves balance and concentration; tap enhances counting and rhythmic skills; tumbling is great for increasing muscular strength and flexibility; jazz works on body awareness & isolations; creative movement allows children an opportunity to express their emotions and love of dance in a supportive environment. We also use dance activities to work on social skills, such as learning to work in a group, to respect group norms, to take turns and listen quietly while others speak, and to respect a teacher's authority. **Each of the 4 classes will include a little "something extra"** (like a short craft or video time) that isn't included in our regular fall program.

#### **Camp Curriculum**

In addition to the dance disciplines listed above, this program also includes daily dance-related arts and crafts, projects that teach about health and nutrition, dance history lessons, and beginning choreography skills. A nutritious lunch is provided while we watch dance films featuring Broadway and film stars, old & new. DVD time and costuming for our free show on Friday are usually our most popular activities!
